Dear Valued Customer

GE Sensing EMEA is committed to being a market leader in supplying Sensors and Sensing Instruments throughout the world. We have put in place strong programs to comply with regulations in all countries in which we do business. Our approach to REACH (Regulation 1907/2006 on the Regulation, Evaluation, Authorisation and Restriction of Chemicals adopted by the European Union in December 2006) is being addressed in the same rigorous manner.

GE Sensing EMEA has been closely following the legislative development of REACH and we are working with our suppliers to ensure that they have pre-registered preparations and substances purchased by us and that there is no risk to continuity of supply.

Under the provisions of REACH GE Sensing EMEA is a producer of articles, which are not intended to release any substance under normal conditions of use and is therefore not required to register with the European Chemicals Agency (ECHA)

With respect to Substances of Very High Concern (SVHC) GE Sensing EMEA confirms that articles it produces contain no SVHC as defined by ECHA as at 9 October 2008 at a level of 0.1% by weight or greater.

If you have any questions regarding REACH please do not hesitate to contact us or visit our website <http://www.gesensing.com/environment/index.htm> where the latest Environmental information will be kept.

Yours sincerely
