GE
Sensing

# RENTAL AGREEMENT

## Rental Period

The typical minimum rental period is one week. However, some products may have minimum rental periods as long as one month. The rental period begins the next business day after the equipment ships from GE Sensing and ends upon its arrival back at GE Sensing.

## Rental Rates and Pricing

- Payments are invoiced upon equipment return, or monthly for extended rentals. Pricing is per the quotation.
- Certain parts, such as thermocouples and moisture probes (in certain applications), are considered consumable and must therefore be purchased when required. Pricing is per the quotation.

## Shipping and Handling

- The customer is responsible for shipping charges to and from their facility.
- GE Sensing will ship via UPS Red NDA, FOB Billerica. It is highly recommended that return shipment be made the same way.
- Installation of the equipment and training can be provided by GE Sensing, at an extra cost, per the quote.

## Return of Equipment

- The customer will receive an RMA number when they receive the rental equipment. The equipment must be returned per this RMA number.
- At the end of the rental period, the customer will, at their expense, return the equipment to GE Sensing. If the customer fails to return the equipment within three (3) days after the end of the rental period, the customer agrees that GE Sensing will have the option to extend the rental period under the same terms, or charge the customer a prorated fee based on the rental period.
- The equipment must be shipped in its original containers or cases.

## Insurance

- Insurance will be at GE Sensing's expense, relating to loss or damage while the equipment is in transit.
- The customer agrees to assume the risk of loss or damage of the equipment while at the customer's facility.
- The customer agrees to exercise due and ordinary care in the placement, use, maintenance, storage, and accessibility of the equipment at their facility so as to ensure its safe operation and proper functioning.
- The customer will keep the equipment in good condition and operating order while at their facility.

## Liability for Damage to Equipment

- The customer will return the equipment at the end of the rental period in good condition with no excessive wear and use.
- The customer will be responsible for all charges incurred by GE Sensing to service and repair the equipment for any excess wear and use. Excess wear and use includes, among other things: i) physical damage; ii) broken or missing parts or accessories; iii) missing manuals and software; iv) if the equipment does not work as represented, or if the equipment is materially unsatisfactory for any other reason.
